
Submenu disappears on dely 0

Posted by nlpkh - 2016/08/31 19:34

When I put cursor on menu - submenu dropdowns.

But If I choose delay 0 and if somebody moves cursor slowly to submenu - submenu disappears, becose there is a place between menu button and submenu button and I guess there is a problem.

Please, tell me how can I fix it? Instead of typing delay more than 0

Try to add the following CSS rule to "CSS Styles" parameter:

```
.ux-menu .ux-menu-sub {margin-top:-1px;}
```

Regards,
