
dropdown menu item not showing

Posted by sifaka - 2016/11/19 20:03

When rendered on my smartphone small screen, the dropdown menu item is covered up by other, primary, menu items.
<http://sifaka.x10.mx/joomla29/>
It does this on Wright template and JA Simpli.

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
.ux-menu .ux-menu-sub {z-index:20001}
```

Regards,
ARI Soft
