
Child Menu cut off

Posted by transferleague - 2010/07/30 17:04

Hello

I am having the child cut off issue on my site. I have read the forum and have tried some of the solutions but none have worked. Could you help please.

My site is <http://www.transferleague.co.uk>

The menu is currently bottom left but I am going to disable the other menus when i get this one working so it will then be top left

Thanks

Hello,

Add the following CSS rules:

```
body #left
{
  overflow: visible;
}
```

```
.ux-menu-container ul.ux-menu li
{
  padding: 0;
}
```

Regards,
ARI Soft

Thank you very much, that worked perfectly.

Thanks again

Hello again

Ome more quick question if you don't mind. One of my menus has 25 tabs, it is not all visible in the window pane , is there any way of making that menu to scroll or should I just break the menu down into two segments.

Thanks again

Sorry, but the module doesn't provide this possibility.

Thank you ,

I will split up the menu.

The menu is working fine in Fiefox but it is not displaying properly on mouseover in internet explorer. Would you have any idea what is causing this?

Regards

Apologies , I disabled the menu overnigh due to this issue, It is now enabled again. The address is www.transferleague.co.uk. I am using internet explorer 7. I have attached a screen grab of the issue.

I love the menu and would like to to use it, your assistance is really appreciated .

Kind Regards

Hi Again

I updated my browser to ie 8 and the menu works fine in it. Strange thing is the menu on your demo sit worked fine in ie 7 for me.

Thanks again for all your help

Kindest regards

transferleague
