## Third Level Not Showing in Vertical menu

Posted by FredBo - 2017/11/01 02:01

---

It's an excellent menu but I have a problem with the 3rd level items of a left-hand vertical menu being behind the main content.

I tried the following CSS that I saw on another thread here, but that doesn't fix the problem. I am using Joomla 2.5 so the main content area could be different.

```
#t3-mainbody {  
position: relative;  
z-index: 1;  
}
```

Can anyone please assist?

Hello,

Is it possible to see the problem anywhere?

I am developing on Localhost. I can fix the problem by increasing the width of the site and the width of the left and right columns, but then I have too much empty space in the columns.

Here is a screenshot: <http://www.ari-soft.com/images/fbfiles/images/menu-2ca07e0fd42c893f29bd767220a7cab5.jpg>

This is a problem with site template styles. We need to see the problem to have ability investigate it. Let us know when your site will be available online (for example on a test server) and we will check it.
