Bold for the text and change color

Posted by sypou - 2010/08/05 01:21

Hi,

I want to know how to bold the text for the menu. Here is the issue.

I use two menus, one on the top (topmenu) of the page and one on the left of the page.
What I want is that I need the topmenu only to be bold. The left menu is normal.

http://www.ari-soft.com/images/fbfiles/images/page_003.jpg

I forget to mention, also I want to change the color for normal and hover.

Thank you,

Sypou

I've added this code but seems like it does not change anything.

```
.ux-menu a
{
 padding: 5px 14px;
color: #316b16;
font-weight: bold;
}

.ux-menu a:hover{
color: #0033FF;
font-weight: bold; font-size: 14px;
}

.ux-menu a:visited{
color: #316b16;
font-weight: bold;
font-size: 14px;
}
```

Thanks,

Sypou

Hello,

Provide link to page where we can see the menu on your site, please. We need to see it because we should know how site template styles affected on the menu.

Regards,

ARI Soft

Hi,

it is in local but I use the "rhuk_milkyway" default template of Joomla.

Any idea?

Thank you,

Sypou

Upload your site to an online server and provide link to page where we can see the menu that we can help.
