
Font Size Change on Drop Down

Posted by kokoruz - 2010/08/09 22:11

I want to be able to change the type size for the sub menu items but it always defaults to the type size dictated in the Module Parameter.

I've tried adding the following css but with no luck

```
#ariextmenu_ariext58 ul.ux-menu li ul.ux-menu-sub li a{ font-size: 10px !important; font-weight: bold !important; text-transform: none !important;}
```

If this is possible could you please steer me in the right directions.

Thank You,

Kurt

We'll improve the module that it provides ability to define font parameters for sub menu items in a future release.
