## setting up drop down. horizontal menu spacing

Posted by crosswire - 2010/08/19 05:13

---

Hi there

I have install the ari-ext module

I created a top menu and positioned it on top. I see it on the page, but its a vertical list and not sure why.

I moved the js and css to template folder and pointed to them on index.php.but not working still.

advice?

thanks

Ps: i figured it out, i had topmenu module also enabled which showed up above it.

1- how can i remove spaces between boxes.

3- there is a jsript error from firefox error console

Ext.ns('Ext.ux'); is undefined
