
right arrow menu not showing up in drop down

Posted by crosswire - 2010/08/19 20:32

I have checked the css code and still cant figure why right arrow not showing up.
its pointing to the right image file.

Hello,

Provide link to page, please, where we can see this issue.

Regards,
ARI Soft

hi see above link

the top menu is on the right side however i wanted it to be the full length of the top till the main menu
also, some of the drop down boxes are out of shape compared to the rest.
under courses and registration, registration should have right arrow but not showing up.

Regarding issue with arrow. It seems you have override some menu styles in /templates/test/css/menu.min.css file and set incorrect path to right arrow in the following CSS rule:

```
.ux-menu.ux-menu-vertical .ux-menu-arrow,  
.ux-menu ul .ux-menu-arrow  
{  
    width:6px;  
    height:8px;  
    top:13px;  
    background:url(../topmenu/css/menu-arrow-right.png) no-repeat;  
}
```

correct this or use default menu styles. About the second question, the menu doesn't provide ability to fill all available space.

thanks for that. Sorry i missed that.

Also, why is there different css files esp menu.min and menu.css..whats the difference between them
If i want to change the style should i work on menu.min.css?

Hello,

The extension uses menu.min.css file, it's minified version of menu.css file. The module doesn't use menu.css file, but it file can be used that modify some styles.
