Sub-menus do not \"drop-down\" with actual template

Posted by coco - 2010/08/25 15:52

_____

Seems to work with other templates, but with the template I currently have the drop-down items do not appear when I drag my cursor over the menu items.
I tried modifying the template.css file but nothing has worked so far.

Please help!

Thanks!

_____

Hello,

Add the following CSS rule:

body #pillmenu
{
  overflow: visible;
}

Regards,
ARI Soft

_____

I'm having the same problem.
I'm using JoomlaHet's J66 template. The submenu's simply don't show up. The main menu-iten displays the arrow to indicate that there are submenu's, but that's it.

The CSS code didn't help (I entered it in the module, I guess that ok).

Any idea?

_____

Hello,

Provide link to page where we can see this issue that we can help.

Regards,
ARI Soft

Wow, fast response!

And just 2 minutes ago I found the problem myself. It is in the template CSS. I needed to change the overflow of a div to visible.
Works like a charm now!!!

_____

To 'CSS Styles' parameter in module settings to site template CSS file.
