
Problems with IE

Posted by Ray - 2010/08/25 17:44

Module works with all browser except IE. The menu is setup vertically, but the pull-out items get hidden beneath main picture on the right. I have read past comments about IE issues in this forum and tried to modified the template.css by setting the overflow to visible without any success. May you help please, here is the link to the site:

Hello,

Add the following CSS rules:

```
body #wrap2
```

```
{  
  position: relative;  
}
```

```
body #wrap2 #left_column
```

```
{  
  position: relative;  
  z-index: 2;  
}
```

```
body #wrap2 #center
```

```
{  
  position: relative;  
  z-index: 1;  
}
```

Regards,
ARI Soft
