## How to?

Posted by PeteH - 2010/08/25 20:07

---

Hi, very new to Joomla! etc and building a site.

I'd like to have dropdown menus so have downloaded ARI EXT menu, installed and the menu now sits at the top of my site (user3 position). :)

However I don't have a clue how to add the dropdown menu bits to the menu. If I make a new menu there is no option for ARI ext Yui etc.

Basically I have a horizontal menu that I don't know how to add the dropdown bits to (you can tell I'm new at this by my expert technical language) ;)

Is there a tutorial? Can you help?

Hello,

Create sub-menu items in Joomla! menu manager. The module shows sub-menu items as drop-down menu.

Regards,  
ARI Soft

Doh!  
Thank you :)
