## which CSS file...

Posted by novi4ok111 - 2010/09/02 05:00

---

Hi all!

I have one question, which CSS file responsible for menu editing?

For example, if i need to change menu width, which CSS rules i need, and where i should put it?

P.S sorry for my English, i'm from Latvia :)

Hello,

The module uses the following CSS file:

/modules/mod\_ariextmenu/mod\_ariextmenu/js/css/menu.min.css

Regards,  
ARI Soft
