Vertical menu IE8 sometimes shown default settings

Posted by matejsosta1 - 2010/09/07 06:16

Hello.
First of all, your module is probably the best module for menus.
I have one question about Vertical menu. When i put one menu in vertical mode and set colour and auto width or width in px in CSS Styles in modulde, there is sometimes problems with showing the menu as i set it. It displays the general menu which is no Auto width and with default color. When i refresh my page then it's normal again.
Why is thi happening? This strange behaviur appears also in mozzila.

Regard's Matej

Hello,

Could you say link where we can see this issue?

Regards,
ARI Soft
