JavaScript error in IE7

_____

Hi
I get an error in IE7, Line 8: Error: Object doesn't support this property or method. I have checked it in Firefox and IE 8 and they are both fine. The site is at http://warrennash.com/index.php.
Thanks in advance for your help.

Hello,

Sorry, but we can't reproduce this issue.

Thanks for trying, I will try on other machines.
Thank you also for a great menu, works great, easy to setup and looks exactly like what the client wants.
