Show submenu when refresh page

Posted by gustavo - 2010/09/13 17:35

_____

I can`t find a solution for this.

I can navigate without any problem, but sometimes submenu items appear for a moment on refreshing the page, it's an ugly effect.

Any solution?

you can see this here http://www.bbi.com.es or http://www.bbi.com.es/v2

_____

Hello,

You use old version of the module. 'ARI Ext Menu' v. 1.0.2 is installed on your site, but the latest version is 1.1.14. Download the module from our site and upgrade it.

Regards,
ARI Soft
