
alignment problem

Posted by linas - 2010/09/28 12:20

Hi,

I have a problem with aligning my ariext menu :(Maybe you have a clue? www.vrkc.lt

Hello,

Could you explain what align you want to change?

Regards,
ARI Soft

Original templates top menu height is 30px, ariext menu - 34px. And problem is that menu buttons is out of background bounds...

Try to add the next CSS rule:

```
#pillmenu .ux-menu li a
{
    height: 28px;
    line-height: 26px;
}
```

Regards,
ARI Soft
