
No submenu

Posted by arkadas - 2010/10/05 11:01

Hi,

Tryed other solutions on this forum...but no result :(

<http://nieuw.fysiotherapiebrouwersgracht.com/>

Menu left first item should have a test submenu...

Thank you very much!

regards,

Arkadas

Hello,

Check that 'End level' parameter is set to '-1'.

Wow that's fast!

Got an arrow in the menu now, indicating that there is a submenu item. But clicking on it gives no submenu.

Might be the menu is under the text?!

regards

Add the following CSS rule:

```
body .contentLayout .sidebar1
{
    overflow: visible;
}
```

and set 'Menu direction' parameter to 'Vertical' instead of 'Horizontal'.

Do i add this to my template css or to the css of the template?

wow.....now the arrow is gone and the module is full with of the page :)

This conflict with site template styles. Add the next CSS rule:

```
.ux-menu-container UL.ux-menu li
{
    float: left;
}
```

Hi,

Thank you for you response. As a matter of fact,am working from my localhost machine. am yet to upload it live. My question was, Where do you add the recommended css code? Is it on the template.css file or the menu.css file of the module?

As I stated, my knowledge of css is limited. Thank you

You can add CSS rules to CSS file of site template, to module CSS file or to 'CSS Styles' module parameter.

Hi,

Please you will have to forgive my naivety..am not very experienced in this. I have added the css code to the template.css file but still there is no submenu item. Or is it that there is a incompatibility issue with some templates. Please assist.
