## Drop down behind image

Posted by xsedgar - 2010/10/06 11:14

---

Hi,

Tryed other solutions on this forum...but no results

[www.quintadaconcha.com/quinta](http://www.quintadaconcha.com/quinta)

Sub-menu behind image on internet explorer...

Thank you very much!

regards,

Edgar

Hello,

It seems this issue occurs only in IE browser. Add the next CSS rules:

```
body #rt-header-surround
{
    z-index: 10;
}
```

```
body #rt-rotator
{
    z-index: 1;
}
```

Regards,  
ARI Soft
