## Menu Centering

Posted by mattDirt - 2010/10/08 16:23

---

I have been using two of your modules on my site and you have been so fantastic in answering all of my questions so quickly.

Well, I have one more question and I can wrap this up. I can't seem to center the main menu at the top. I tried to use padding on the left but in most browsers it added a bunch of white space on the right when I reduced the browser size.

Here is the link.

xxxxxx

Once again thanks for all of your help.

Hello,

Use the following CSS rules:

```
#hometopnav .ux-menu-container
{
  text-align: center;
}
```

```
#hometopnav .ux-menu
{
  display: inline-block !important;
}
```

Regards,  
ARI Soft

That is the fastest I have ever gotten a response. I didn't even have time to hit refresh in my browser before I got an answer.

Great work as always!
