
Detailed results through mail

Posted by ykracht - 2011/02/15 16:31

Is it possible to send detailed results like which questions you had wrong, to the mail of the person who took the quiz?

so like:

Question 1 should have been you entered

score .../...

Question 2 should have been you entered

score .../...

etc.

=====

Hello,

No, the component doesn't provide this ability.

Then is there a possibility to actually place a page on the frontend, where you can look in to your own results?

"ARI Quiz" can show detailed results about each question at the end of a quiz, "ARI Quiz Lite" can show only short results information.
