How create a Language pack ?
Posted by lordbdp - 2011/02/19 21:52

Hi all !

1) I want to know witch files are to modify.
2) Who modify the database for the translation of the toolbar ?

I have find the tutorial for creating the Pack but for the database modification : nothing find.

Tks.

Hello,

Do you mean "ARI Quiz" or "ARI Quiz Lite"?

Regards,
ARI Soft

You can export language XML files on "Languages" and "Languages Frontend" pages on component backend, translate them and import. For this open "Languages" ("Languages Frontend") page, choose "English" (or another language) in language data grid, click "Export" button, save and translate XML file and then import it with help "Import" button.
