filter

Posted by kkshansid - 2011/03/10 05:51

_____

hi
i am using ari quiz lite
http://localhost/administrator/index.php?option=com_ariquizlite&task=quiz_list
on this page filter not work an change event
my requirementis that list update on change of select but list only update after changing+clicking on link
on which file javascript is calledd to filter the list.So that i can change it to onchange event of selection box

_____

Hello,

It works in the next way, a user configure filters and then click "Filters" button. If you have any suggestions you can submit feature request here.

Regards,
ARI Soft
