Quiz results detail ==> Blank page

Posted by quatsch - 2011/08/02 08:35

Hello everyone,

I'm currently using Ari Quiz Lite

When A user accesses it's results page it shows a list of all the quizzes the user has done. And on the right for every quiz there is a detail link. When the user clicks on this link it gets an empty page. is this normal? what is this due to?

Yann

Hello,

Open quiz settings page and check that a text template is selected in "Successful Template" and "Failed Template" parameters.

Regards,
ARI Soft
