categories and quizzes and ACLs

_____

Hi,
I have just started playing with Lite on Joomla 1.6 and have a need to do the following:

Quiz 1 - Group 1 to group 6 can take quiz
quiz 2 - Group 2 to group 6 can take quiz (not group 1)
quiz 3 - Group 3 to group 6 can take quiz (not group 1 and 2)
quiz 4 - group 4 to group 6 can take quiz (not group 1, 2 and 3)

...and so on ;)

Is there a way of doing this and using the questions from all the quizzes?

Basically group 6 can see all questions. I wanted to be able to set a quiz for group 6 nd use questions from quizzes 1-5 in the quiz.

Hopefully it's clear but if not please ask as i have a habit of being confusing :S

Hello,

"ARI Quiz Lite" doesn't support described ability. It requires custom modification.

Regards,
ARI Soft

thanks for prompt reply.

Which bit doesn't it support?

The complex groupings and access?

as well as not being able to use questions from other quizzes/categories in new quizzes?

I assume I can prevent access to certain quizzes by just specifying which user group has access via normal joomla security groups?

Sorry but i am new to joomla and your module which doesnt help any of us!!!

thanks for any help

_____

The extension supports ability to choose specific group which will have access to specific quiz ("Access (User Group)" parameter in quiz settings).

"ARI Quiz Lite" doesn't provide ability to share questions between different quizzes.

Fantastic.

Thanks for clarifying and a prompt response.

regards
