Show Created Quiz on Site

Posted by ManicSF - 2011/11/16 19:37

_____

Hi, I'm fairly new to working with Joomla 1.7 and wanted to know how to publish a quiz onto my site.

I installed ARI Quiz Lite successfully and created a quiz. When I go into Menu Manager and create a new menu, I don't get a selection for Ari Quiz Lite, it asks me to type in a menu type instead.

I'm sure I'm just missing something small that needs to be done, but any help at all would be greatly appreciated.

Here's are some screenshots of what I'm doing:

Thanks,
Shawn

_____

Hello,

Click "Select" button on menu item edit page and choose appropriate type for menu item. It is standard Joomla! behavior.

Regards,
ARI Soft
