How to reset the Quiz of user
Posted by josechan - 2011/11/29 12:39

_____

I'm trying to create a Placement test using ARI Quiz Lite, then I set the test for register user and time limit for the quiz. Because I only create few user account and would like to reuse them again and again.

But the problem is if the previous user didn't finished the quiz, and the account assign to other new student the quiz is continuing the previous one with the same answers and remaining time.

So, how can I reset or clean up the quiz, so that I can assign the same account to other new student.

_____

Hello,

The extension saves quiz sessions state for registered users. Use different Joomla! users for different students.

Regards,
ARI Soft

_____

Is that any way for admin to check the status of the registered user?

_____

Administrators can see results of finished quizzes. If you wish, we can provide a SQL query which will delete all unfinished quizzes for all users or for specific users.

_____

Use the next SQL query:

DELETE SI,S FROM jos_ariquizstatisticsinfo SI LEFT JOIN jos_ariquizstatistics S ON SI.StatisticsInfoId = S.StatisticsInfoId WHERE SI.Status "Finished"

---

or the next if you want to delete not finished quiz sessions for specific users (for example with user ID equals to 75):

DELETE SI,S FROM jos_ariquizstatisticsinfo SI LEFT JOIN jos_ariquizstatistics S ON SI.StatisticsInfoId = S.StatisticsInfoId WHERE SI.Status "Finished" AND SI.UserId = 75
