## If statement in JCE/TinyMCE to modify text template

Posted by antmi - 2012/01/15 20:33

---

hi, I work in Joomla 1.5 and I have a problem in html. When I press hide/read in JCE I have this:

Dear, {\$UserName}! the result is {\$Passed}.

and I need to do something like this but I don't know how...:

{UserName}, the result is {Passed}.

I can't find a way to import an "if" statement in there... can't i use php in JCE or TinyMCE? How can I do it?  
Any ideas? Thanks a lot in advance.

Hello,

The extension supports ability to use one text template when a user passes a quiz successfully and another for failed quiz. Use "Successful Template" and "Failed Template" parameters in quiz settings.

Regards,  
ARI Soft
