
Cannot create questions?

Posted by drvuk - 2009/09/10 15:22

The Help explains how to create questions under "9 Questions Management".

But "Questions Management" is nowhere to be found on the menu -- or I miss it somewhere?

I already created Quiz and Quiz categories.

This is the menu I see:

- * Quizzes
- * Quiz Categories
- * Question Categories
- * Question Templates
- * Text Templates
- * Quiz Results
- * Languages
- * Languages Frontend
- * Templates
- * Help
- * F.A.Q.
- * About

Suggestions? I would appreciate.....

Hello,

Open 'Quizzes' page on the component backend and click 'View' link in 'Questions' column in quizzes data grid.

Regards,
ARI Soft

It's very hidden indeed.

Thanks!
