
No Quiz?

Posted by PT Lyon - 2009/09/11 17:30

Hi!

I created the category, the quiz and the questions. And I created the menu.

The Access level I choose was Author, because IÔ'm testing it first.

So I went to teste it, but when I go to the menu link, it leads me to the category quiz, I believe, where there is my test quizz. I click on it, it opens the link, but there are no questions. Only the title of the quizz, and "Developed by ARI Soft" below.

Help :(

Hello,

Could you say link where we can see this issue?

Regards,
ARI Soft

done.

Thanks.

I forgot to say, the link menu is in the right side, where it says "Menu de Utilizador", in "Quiz"

It seems that you try to start quiz under user which isn't author. If you try to start quiz under author, you should see 'Continue' button and can start quiz.

I wanted to test it first...

So, admins and other user groups can't participate?

If so, I will create a user to test it.

But as a suggestion, the groups above the chosen one should be able to participate.

Thanks a lot again!

Administrator is backend user group, but author is frontend user group. If you choose author user group, it means that users with author or editor or publisher role can take the quiz.
