French localization

Posted by JeanMarcG - 2009/10/03 10:52

Hi,

I would like to try to localize Ari quizz lite in french, at least the frontend part. Is there a language ressource file, sql tables or are you compliant with joomfish ?

thanks for your response

Jean Marc

Hi

I found the way to do it, using import/export functions of the frontend language panel. and most of all, that works !

Hello,

You can use 'Import/Export' feature for this purpose on language page or you can click 'Add' button, change messages and click 'Save'.

Regards,
ARI Soft
