
How can i show in the frontend the results of last

Posted by MoD - 2012/02/29 23:05

Hy i use the joomla 2.5 with ari quiz lite if i or someone do the quiz that if created there only come on the end a percent result but not the result with the answers of the quiz. How can i konfigured it to show the right answers at the end of the quiz.

Please help me!!!!

Thanks
MoD

Hello,

"ARI Quiz Lite" doesn't support this ability. It is possible to do it with "ARI Quiz" extension.

Hello ARI Soft Team,

but in the description of ARI Quiz Lite was written, that it should do it, also in the Demo was showing.

But if it doesn't work no problem.

Special Thanks to answered my questions.

Best regards
MoD

If you want to show common information about quiz results (not detailed information about each question, this feature is available only for "ARI Quiz" and "ARI Quiz Lite" demo doesn't contain this feature), select appropriate text template in "Successful Template" and "Failed Template" parameters in quiz settings.
