
New problem with language

Posted by Sasso - 2009/10/31 01:46

Unfortunately i've another problem...this time about the language :(

When i try to edit my language in Language Frontend, get this error:

Warning: Invalid argument supplied for foreach() in

http://url/administrator/components/com_arquizlite/templates/blang_add.html.php on line 45

or just a blank page.

It's ok with Ari Quiz Lite > Languages.

I think that problem is related to my server. So, i cannot add a new language (in frontend).

I could add my language through a query, and making these new files:

administrator/components/com_arquiz/i18n/cache/ifronted/mylang.php

administrator/components/com_arquiz/cache/files/ifronted/mylang.xml

Now the problem is that i don't know what to put in the query for the content.

This would be my query:

```
INSERT INTO `jos_arquizfile` (`FileId`, `Content`, `FileName`, `Group`, `Size`, `Description`, `ShortDescription`, `Created`,
`CreatedBy`, `Modified`, `ModifiedBy`, `Extension`, `Height`, `Width`, `Flags`) VALUES
(4,
content???,
'mylang.xml',
'ifrontend',
4709,
NULL,
'MyLang',
'2009-10-31 02:42:53',
62,
NULL,
NULL,
'xml',
0,
0,
1);
```
