
I down loaded your paid, now nothing works!

Posted by mikepowerline - 2012/04/04 20:17

I am at deadline with a customer, had a lite version of your software installed and then upgraded. I noticed it keeps the lite version underneath and I can't seem to uninstall that. Now the whole extension seems glitchy, when I try to choose type of question nothing seems selected or able to save properly. Upon entering a short Test Quiz, I login, go to the quiz, the program shows me no questions just goes to the last page saying I failed.

I also, want to know is it possible to have an entry form required for a client to take the test and for the extension to send a certificate at the end of the test with some customer information?

Please help as our site needs to go live, thanks,
Mike
