Hello! I have a big problem! I created a quiz. She regularly worked. Then there were a few more quizzes. And suddenly it all stopped working. Now, after I click continue, quiz page immediately gives the result. That is, do not ask questions. But they are in the admin.
Why is it so?
And again, on the page with the result End date 1999-11-30 00:00:00

Why is it so? Please help, it is very important!

Hello,

We can investigate the problem if you provide a link to a page where we can see it and provide a temporary access to your J! backend by email.

We can't reproduce the problem. After login on your site, quiz list page is loaded when we try to open a quiz page.
