## How do I let frontend users see details for a quiz

Posted by fribse - 2012/04/28 18:33

---

I've created a menu item for viewing test results, on the line with the quiz result, it has a link to details. But when a user clicks on it, it just shows a blank page. How do I let the user see the detailed answers?

Hello,

Where we can see the problem?

Regards,  
ARI Soft

The site is called [www.dkdb.dk](http://www.dkdb.dk). You can find the quiz lite under the menu Personlig -> Tests, first line is take a test, second line is view test results. I'll email you the credentials.

Ahaaa, I figured it out!!!

I should set the fail and success templat in the quiz, then it shows the results correctly!
