## Questions are croppped too short in backend

Posted by Arvur - 2009/12/21 10:56

---

Is there a way to configure question length in the list?

[http://www.ari-soft.com/images/fbfiles/images/2009\\_12\\_21\\_135324.png](http://www.ari-soft.com/images/fbfiles/images/2009_12_21_135324.png)

It seems much more text could fit into the column ;)

P.S. Nice component! Thanx!

Hello,

You can change it in the following file:

/administrator/components/com\_ariquizlite/templates/question\_list.html.php

See lines #36-39, these contain the following code:

```
if (AriText::htmlStrLen($question) > 50)
{
    $question = AriText::htmlSubStr($question, 0, 50) . '...';
}
```

Change '50' for appropriate value.

Regards,  
ARI Soft
