## Multiple questions in a single page?

Posted by ypouliot - 2010/01/09 19:07

---

Howdy all. I'm wondering if there is any way to show \*multiple\* questions in a single page. I rather suspect this isn't possible, but perhaps I'm wrong?

Cheers!

Yannick

Hello,

ARI Quiz Lite doesn't support this ability, but we are going to add this possibility in one of the future versions of ARI Quiz.

Thanks for the quick reply. How about this: in either Quiz Lite or the full version support, can a question of type Multiple Question have more than 3 answers? That would work equally well for my needs...

--- oops, never mind, I just discovered that I can do so with the "+" button!

Hello,

"ARI Quiz Lite" doesn't provide this ability.

Regards,  
ARI Soft

do you have a solution for my problem? we can get database and create loop question from our database or modify file transmission parameters to file "components/com\_ariquizlite/view/question.html.php".

This feature requires additional coding, the component is open source and you can implement this ability by yourself or submit feature request here and we'll think about adding this possibility in a future release.

BTW, this feature will be available in ARI Quiz soon.

Hello

Old thread coming alive. B)

I'm also wondering if there is any way to show \*multiple\* questions in a single page.

I have the AriQuiz Paid Version 2.10.3 version but can not make singlepage with more then one question?

Hello,

Sorry, but currently the extension doesn't support this feature.

Hello,  
is the "multiple questions in single page" feature implemented in latest AriQuiz version?  
Regards  
LC

Hello,

This feature is supported by "ARI Quiz". "ARI Quiz Lite" doesn't support it.
