
2 questions

Posted by ilan5555 - 2012/08/16 09:41

Dear friends,

I've created a test with 25 questions, each question scores 4 points.
When I take the test it shows me question 1 of 10.

How can I show all my 25 questions?

And - If I want each student to take just 1 test and not to take it again, how can I restrict it?

Thank you.

Ilan,

=====

I found a little bug and now it works.

My only question is if someone took one test and failed, how can I release just him to take a new test?

Hello,

1. Complete previous quiz session then open quiz settings page and set "Question Count" parameter to 0
2. Set "Attempt Count" parameter to 1 in quiz settings. It works for registered users.

Regards,
ARI Soft

Wow!!
Thank you for your QUICK response!

I did it but I saw that there was a problem on the question category, although that the Question Count was 25 it showed only 10, so I put 0 and it helped.
