## Show Answers on results template

Posted by brentc - 2010/01/28 01:27

---

When a member takes the test how can they see the answers to the questions they missed? It gives them a percentage but no answer key.

Is there a param to show the correct answers or something similar?

Thanks

Hello,

ARI Quiz Lite doesn't support this ability, but you can be interested in ARI Quiz which supports this and many other possibilities.

Hello

I'm looking how to show all the answers on the result page. I have the pro version. thanks

Hello,

Set 'Show Full Statistics' option in quiz settings to 'Always'.
