## Question Count

Posted by sokko - 2010/02/02 00:31

---

Just letting you all know that the Question Count feature doesn't work.

You can find the problem here in this post..

<http://www.ari-soft.com/ARI-Quiz/2696-Order-by-category-when-fetching-questions.html>

Any fix for the lite version?

Thanks

Hello,

Thanks for report, we'll check this feature in ARI Quiz Lite and if it doesn't work, we'll fix it in the next version.

Regards,  
ARI Soft

Hello,

We can't reproduce this issue on our testing server. Do you use the latest version of the component?

Regards,  
ARI Soft

Hello, here happens the same. The quiz was configured to have 5 questions but It was possible to add a 6th. Using the latest version of "ari quiz lite" available on the site. Anyway, it is no great issue since when creating/configuring the quiz we just set the proper desired number of questions.

Hello,

Provide temporary access to your Joomla! backend by email that we can investigate this issue.

Regards,
