
Backup and support for Joomla 3

Posted by athanazio - 2012/10/15 04:23

I'm facing a problem. I need to change my joomla installation and consequently I will need to backup and restore quizzes and questions that I already have in the current Ari Quiz Lite install.
And another question is if Ari Quiz Lite offers support to Joomla 3.

Thanks for the answers.

Hello,

Create backup for all tables in database with prefix "_ari" and then restore it on new Joomla! database.

Currently the extension is not yet compatible with Joomla! 3.0.

Regards,
ARI Soft
