
Quiz does not progress

Posted by Sachin - 2012/10/31 09:24

Something has gone wrong with my installation. It was working perfectly until today morning. Now, suddenly, any of the quiz do not progress at all. The first question is displayed, and whether you answer it correct, or wrong, or even skip the question, the screen only refreshes and the same question is displayed again and again. It does not progress.

FYI, the changes that I made today morning were - changed 'Passed Score' to all quizzes as 50 (earlier it was either 0 or some other number like 9 or 5) and added 'Question Time' as 15 to all quizzes (earlier it was 0).

After I encountered the problem, I changed back to the original settings, but it did not help. I even tried creating a new trial quiz, but the problem still remains the same.

Thanks.

Hello,

Provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate it.

Regards,
ARI Soft
