## Quistion Count not working

Posted by redmac - 2013/01/23 12:32

---

Hi,

I've download AriQuiz Lite last week. I have setup about 17 quistions and on 'Quiz' level I have set the question count to 10.

But it keeps asking 17 questions.

Any idea on how to fix this?

Thanks,

Redmac

Hello,

Complete previous quiz session and start the quiz again. If it doesn't help, we can investigate the problem if you provide a temporary access to your J! backend by email.

Regards,  
ARI Soft
