
multi languaged ?

Posted by balulilu - 2010/04/25 22:39

Hello one more time !

I wander if it is possible to make ari quiz lite multi language ? not to have two languages in back-end and set one of them as a default but when my user sets different language on front end i want quiz interface to be changed as well ? is that possible ?

not the questions but interface ? like result page ?

if users sets english it will show "dear gust you have" but if he sets gerogian it will show "ëÕØàäĐáÝ áâãÛĐàÝ . . . "

any plugin for joomfish or something like that ?

=====

Hello,

"ARI Quiz Lite" doesn't provide this ability, only language which selected as default on the component backend can be active.

Regards,
ARI Soft
