free text answers

_____

With a free text question I have two correct answers: GREEN and YELLOW.

How does a user have to answer?

GREEN YELLOW is not seen as the correct answer.
GREEN, YELLOW also is not seen as correct.

What kind of token has to be filled in between GREEN and YELLOW for a correct answer?

Kind regards,
Harry85

Re:free text answers

_____

Hello,

Correct answer(s) are entered in question settings in "Additional Settings" section. The extension accepts only one answer, it can't combine different answers from "Additional Settings -> Correct Answers" parameters.

Regards,
ARI Soft
