Blank Component

Posted by Guest1024 - 2010/05/06 02:34
_____

I just installed the ARI Quiz Lite component to my Joomla 1.5 site. It said the installation was successful and displayed in my list of components. HOWEVER, when I click on anything related to the quiz the page goes completely blank (for example, I tried seeing the ARI Quiz information and view quizzes).

I uninstalled the component and reinstalled it, but I still get a blank white screen. Any ideas?

Hello,

Provide temporary access to your Joomla! backend by email, please, that we can investigate this issue.

Regards,
ARI Soft
