
Ari Quiz anywhere doesn't work with Ari Quiz lite

Posted by Carrillo - 2013/06/12 13:02

Hi!

i'm trying to use Ari Quiz Anywhere to show a quiz inside a Joomla article, but instead doing that, it shows the code:

```
{ariquizanywhere quizId="1"}{/ariquizanywhere}
```

It seems the Ari Quiz anywhere plugin doesn't work with lite version of Ari Quiz.

I'm using Joomla 3, and the plugin is active.

Any suggestions?

thank you very much!!

Hello,

"ARI Quiz Anywhere" plugin works only with "ARI Quiz".

For "ARI Quiz Lite" you can try 3rd party plugin called ARI Quiz Lite in Content.

Regards,
ARI Soft

Thank you very much for your response.

I've tried to install ARI Quiz Lite in Content, but seems to be incompatible with Joomla v3 :-/

You can upgrade "ARI Quiz Lite" to "ARI Quiz" and use "ARI Quiz Anywhere" plugin to embed quizzes into articles.

Yes, I will, but first I wanted to test Lite version with content plugin to see if it supplies my needs.

Thank you anyway!
