
How to add \"Name\" to results ??

Posted by daver - 2013/07/24 15:32

Hello, at first sorry for my english.

I need to add field "Name" to the e-mail results. Dunno how to do that..
If guest complete Quiz \$username is "Guest". I want to put the name of guest instead.

For example:

One of question is "What's your name?"
Answer: Jack Spencer

and i want to add "Jack Spencer" to email. Please help !

Hello,

It requires to modify the extension.

PS: "ARI Quiz" can show form for guest users where possible to enter name/email and then use them in text and mail templates.

Regards.
ARI Soft
