problem with a link from text templates

Posted by brugal - 2013/07/26 20:15

_____

i've introduced "ari quiz lite" in a cell of an article by using "ARI Quiz Lite in Content" plug-in. It works well. However, i have a problem when i link an article from the text templates. The link works but not right at all, due to the "jumping" is making into the cell.

It's difficult to explain, much better if you can have a look

web: www.adivino.net.mialias.net
user:***
password:***

Any idea?

_____

If you want to load the link to a main browser's window, add target="_top" attribute to tag of the link.

Regards,
ARI Soft
