
total number of points

Posted by brugal - 2013/08/12 16:49

It is possible to know the total number of points acumulated of a registered user of all the quizzes he has played?

For "ARI Quiz" we can provide "ARI Quiz Summary Results" module which shows total score for users on frontend.

Hello,

It is possible to show points instead of percentage (for this set "Result measure unit" parameter to "Points" in module settings), but results will be sorted by percentage in any case.

The module sorts results by percentage.
